Dear manager,

I am pleased to submit my resume for consideration for the available role as an SQL Database, Oracle Database, C# developer and backend Programming with your company. Given my background in developing application solutions and talent for solving database problems, I feel I am in a great position to make a positive impact with INEOR.
 In addition to my formal education and training, my 18+ years of hands-on experience as an SQL and Oracle DBA and backend developer make me a good match for the demands of this position. I would like to have experience in a European environment to gain knowledge of the working style of a developer in your company. I also have a passion to have experience with a wide variety of Database solutions. As an engineer, programmer, and backend Developer, I take up challenges and enjoy being challenged, and I have a reputation for producing the best product experience, irrespective of category.

I am excited by the idea of becoming part of a developing team where I can learn even more. I am now a Leader of Software Engineering Team for Golrang System, but I would greatly appreciate the chance to expand my knowledge by joining your team.

The attached resume can give you more detail of me. I am ready to interview with Skype. It is worth noting that I have an interview with the German Embassy in time and I hope that we can meet soon if we agree.

Thank you for your consideration, and I look forward to hearing from you.
Yours faithfully,
Reza Nikkhouy
